Education

Lamar University | *B.S., Computer Science*

Dec 2026

Experience

Deepiri

Dec 2025 - Present

Frontend Developer Intern

Remote

- Develop and maintain responsive web applications using React.js and JavaScript, focusing on high-quality user interfaces and cross-browser accessibility.
- Integrate and manage data from RESTful APIs, ensuring efficient state management and smooth data flow throughout the application using React Context API.
- Collaborate on the design and implementation of reusable UI components with Tailwind CSS, improving development speed and maintaining consistent design standards.

Handshake AI

Nov 2025 - Present

AI Trainer - Generalist

Remote

- Evaluated and provided feedback on AI-generated responses for accuracy and relevance, contributing to the improvement of Large Language Models (LLMs).
- Documented errors and suggested enhancements for AI models, collaborating with developers to refine system performance and user experience.
- Participated in asynchronous projects focused on testing and training AI, enhancing problem-solving skills and attention to detail.

Lamar University

Aug 2025 - Present

Student Success Mentor

Beaumont, TX

- Mentor freshman students in technical skills and academic planning, helping them navigate computer science coursework and university resources.
- Collaborate with faculty to develop success plans and resources, fostering a positive and inclusive learning environment for new students.
- Monitor students' progress and offer regular feedback to support their transition into the Computer Science program.

Notable Projects

FlashCard: Interactive Quiz App

- I built a React app that fetches questions from the Open Trivia API and tracks user scores.
- I used Tailwind CSS to create a responsive layout that works on mobile and iPad Pro.
- I implemented a mapping system to link UI categories to API IDs for accurate data fetching.

Chef Claude: AI Recipe Generator

- Built a React.js application that allows users to enter available ingredients and receive AI-generated recipes through the Claude AI API.
- Designed a responsive user interface with dark mode and recipe-focused styling.
- Technologies: React.js, JavaScript, CSS, Claude AI API

MovieFinder: Movie and TV Browser

- Built a React.js movie discovery application with search, genre browsing, trending content, saved library features, and dark/light mode.
- Integrated external movie data and designed responsive layouts for mobile and desktop users.
- Technologies: React.js, JavaScript, CSS, REST API

RecipeFinder

- I built a React.js app using a REST API to search recipes and display ingredients and nutritional facts.
- I designed a dynamic UI to show real-time data like cook times, servings, and calories.
- I used the Context API to manage state across components for a fast and efficient user interface

SKILLS

- Languages: JavaScript (ES6+), HTML5, CSS3
- Frameworks & Libraries: React.js, Tailwind CSS, Bootstrap
- Tools & Concepts: Git, GitHub, Netlify, VS Code, REST APIs, Context API, Responsive Design, Accessibility
